STUDENTS LIVING IN CAMPUS APARTMENTS BUILDINGS CAN PAY RENT FROM ANDROID SMARTPHONES

0 Comments 07 DECEMBER 2010 BY SHANE MCGLAUN Like Tweet 22

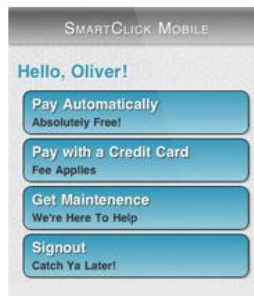

Worth Reading? + -

If you are college student that lives in an apartment owned by the **Campus Apartments** company you can get a cool new app for your Android device and the iPhone that lets you pay your rent right from your phone. The app is called SmartClick mobile and is a free download.

The app lets you pay rent and submit service requests from one place. You can also access the payment service from any device with a web browser. Using the app students can also schedule automated monthly rent payments using a credit card.

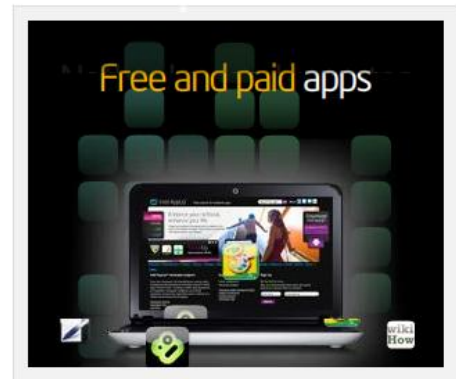

That app sounds pretty cool and will make remembering to pay rent easy for the student more focused on finding a good party or cramming for a test than paying bills. You can download the app right now on the Android Market.
